PRODUCT DESCRIPTION

The LB-USBS20V USB Skype Hands-Free Talking is designed for users that frequently process Internet voice or video chatting but suffering from the uncomfortable and length-limited headsets. Now, stop sitting still in front of your computer, take off those lousy headsets, click a button and enjoy a terrific truly hands-free talking!

With echo cancellation technology, the LB-USBS20V USB Skype Hands-free Talking lead you a high quality hands-free

VoIP environment. The on/off hook buttons design is dedicated to VoIP-via-Skype users and allows you to receive a phone call with simply a casual clicking on the “answer” button, as well to terminate the call with “terminate”. And, with adopting latest Xear 3D technology and EAX, A3D system, the Hands-Free Talking is just as good a high quality USB Speaker for your various multimedia demands.

Just plug the speaker and get started. The speaker is fully compliant to USB 1.0/2.0 standards, don't bother seeking outlets for the annoying adapter. With user-friendly driver installation, you've been ready for the unlimited VoIP surfing!

Xear 3D technology
